DETAILED ACTION

Allowable Subject Matter

1. Claims 1-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

A mobile terminal including a short message service, comprising: a receiver configured to receive only an index corresponding to a selected multimedia event if the mobile station already contains data corresponding to the selected multimedia event, wherein the index is read from a Multimedia Teleservice field added as a new teleservice to a transport layer of said short message service, and wherein a designated User Data sub-parameter of a teleservice layer located under said transport layer of said short message service includes a prescribed field that includes a first byte representing a total number of packets required to send said data corresponding to said selected multimedia event a second byte representing a number of a current packet, a third byte representing a current data index, a fourth byte representing a type of said multimedia event and fifth and higher bytes storing said data. A mobile terminal including a short message service, comprising: a transmitter configured to transmit only an index corresponding to a selected multimedia event if a receiving mobile station already contains data corresponding to the selected multimedia event, wherein the index is read from a Multimedia Teleservice field added as a new teleservice to a transport layer of said short message service, and wherein a designated User Data sub-parameter of a teleservice layer located under said transport layer of said short message service includes a prescribed field that includes a first byte representing a total number of
